ABOUT COMPANY

We significantly score over the plethora of softwares straddling the marketplace because of our single-minded, overarching business philosophy of "Customer Empathy". "Customer Empathy remains" the central focus of all our actions. We pursue active customizations that match our software with the client's workflow rather than the other way around.

Take Any Test

*(Online Tests, Analytics,
AI-Proctoring)*

A state of the art platform
for versatile
Online testing across genres

For More details, visit:
www.koneventures.com,
www.schoolbellq.com

Controlled Randomization:

While creating randomized question sets manually for up to 4 sets of question papers has been done before, what if we tell you that our system lets you give all 40 students in the class a unique question paper, and all of them conform to the same criteria.

NQL- Next Question Logic:

A proprietary algorithm makes our Online tests throw a question to users based on the purpose of the examinee, from a Learner mode to a Testing mode. The sequence & selection of the question makes a highly effective platform for the holistic development of student/test-takers.

AI Proctored Exams:

Our AI engine verifies the user's face and detects movements or sounds in the exam window. It also detects instances like No face, multiple faces or if multiple tabs are opened during the exam. It is programmed to throw alerts to the examinee for potential Proctoring violations.

Result Analytics:

Proctor Results: Post exam, the proctor results can be downloaded in pdf format. Proctor also records the visuals /snapshots of the candidate while appearing for the exam.

Result Insights: in-depth and multivariate analysis of the examinee's performance is captured in the performance analytics.

IoT

(Custom IoT Solutions)

We also have demonstrated the capability to work with IoT (Internet of Things) and integrate them with our automation systems like RFID cards, Biometric Attendance & Live Bus tracking through GPS integration

Smart lock

Smart locks provide users the ability to unlock their door without a key, from anywhere, as well as distribute virtual keys to visitors, through a smartphone or other internet-connected device.

Smart home automation

The Internet of Things-based Home Automation system, as the name suggests aims to control all the devices of your smart home through internet protocols or cloud-based computing.

Smart plug for heavy load

A powerful connector to handle heavy appliances. Smart plug or heavy-duty plug has the power measurement circuit, inbuilt surge protectors & ceramic housing for electrical protection.

HR - Infinity (Recruitment to Retirement HR Suite)

Human Resources Management System (HRMS) automates HR processes.

Recruitment Management:

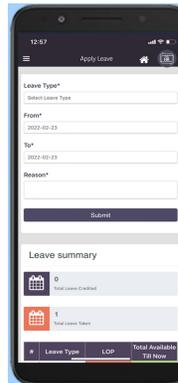

Vacancy detection based on the critical drivers & AI matched CVs to vacancies powers our recruitment module. The built-in video feature for interviews with rich UI with relevant question bank for the interviewer /interview panel seamlessly accelerates the recruitment processes.

Face Recognition Based Attendance With GeoTagging with high accuracy that makes it foolproof and reliable tool for capturing attendance.

Leave Management

Leave workflow built to manage leaves automatically and categorized into different types. One can apply for leave and get approved digitally.

Performance, Review & Appraisal

Custom detailed Appraisal sheet can be configured to calculate the score is based on weights assigned to the self, supervisor, reviewer appraisal, and discretionary scores with the HOD/Principal.

Payroll Management

Monthly Salary computation is automated linked with Face recognition-based attendance. Multiple Salary plans can be designed, assigned & linked to the attendance module. Payroll and Payslips are available are auto-generated & employees can access them in their apps.

RECRUIT EAZY
Difficult Positions Filled With Ease

Recruit Eazy (Fill Difficult Positions With Ease)
